

INTRODUCING reACT™

THE STATE OF THE ART STRENGTH TRAINER THAT TONES & SHAPES FROM THE BOTTOM UP!

Validated by years of eccentric research and development, reACT Strength Trainer represents a paradigm shift in strength training. reACT provides zero impact anaerobic exercise, rapid strength gains, along with improved balance and core stability in just minutes per session.

EXPERIENCE THE PROVEN BENEFITS OF ECCENTRIC STRENGTH TRAINING

- > Improved Core Strength & Stability
- > Improved Balance & Coordination
- > Rapid Increases in Strength & Power
- > Zero Impact Conditioning

reACT IS DESIGNED SPECIFICALLY FOR:

- **FITNESS: HEALTH CLUB MEMBERS & PERSONAL TRAINERS**
- **MEDICAL: PHYSICAL THERAPY, REHABILITATION & FALL PREVENTION**
- **ELITE PERFORMANCE: SPORTS & HIIT STRENGTH TRAINING, MILITARY & LAW ENFORCEMENT**

WHAT THE PROS ARE SAYING:

"I AM HAVING TO CONSTANTLY ADAPT TO THE CHANGES OF THE SPEED AND LENGTH OF MOVEMENT. MY BODY NOT ONLY WORKS TO ABSORB THE ECCENTRIC LOAD BY KEEPING THE MUSCLE UNDER TENSION, BUT I AM HAVING TO REACT TO THE MOVEMENT BECAUSE THE MACHINE CONTROLS THE LOAD."

STEVE WATERSON
STRENGTH & CONDITIONING COACH
TENNESSEE TITANS FOOTBALL

"ITS HARD TO GET THIS MOTION WITH PERFECT FORM ON A FREE WEIGHT FOR SOMEONE WHO IS NOT USED TO THAT KIND OF TRAINING, IN A SHORT PERIOD OF TIME."

GUNNAR PETERSON
CELEBRITY TRAINER
CSCS, CPT

reACT Strength Trainer Features	User Benefits
1 AccuTouch Moisture-Resistant Interactive Display Monitor	Single button start, adjustable time and speed, auto-stop feature; provides complete control when user is in the forward-facing position
2 3 Pre-Programmed Exercise Workouts and Unlimited Speed/time Variations	Quick start and customized programming to all user levels
3 EvenFlo Multi-Speed Drive Train	Industrial grade motor facilitates individuals of all shapes and sizes at precise speed and motion/movement Reverse elliptical movement with floating pivot points and pitch position optimizes eccentric muscle activation 10-speed settings allow for progressive and regressive speed settings
4 FlightDeck Movement Platform	Wide base platform with non-slip surface allows for multiple foot placement/body positions for a variety of exercise applications
5 Side-Mounted Auxiliary Control Panel	Additional control mechanism allows instant stop, speed adjustment upward and downward when user is in the side-facing position
6 Wrap-Around Heavy Gauge Rail System	Provides 360-degree safety support from any position on the machine
7 Infra-Red Work Zone Protection	Emergency Auto Stop Safety feature based on military-grade infra-red beam technology provides immediate stop when beam is interrupted
8 Low Profile Step-Up Height	Allows easy entry and exit for users of all ages and abilities for superior performance and functionality
9 Error-Detection System (EDS)	Internal error detection system immediately stops machine in the event of an internal system error

Technical Specifications:

Dimensions:	Height:	Base Size:	Weight:
	4.6 ft	7.5 ft L x 3.5 ft W	617 lbs
	1.42 m	2.3 m x 1.1 m	280 kg
	Electrical: 110V / 220V		Max Load: 350 lbs / 158 kg

Construction:

- > Full Metal Frame with Robotic Welding
- > ABS Industrial Grade Plastic Shell
- > Sealed Electronics
- > Upgradeable Programming (2) USB Ports
- > Operating System: Windows CE 6.0

Warranty:

- > Frame7 years
- > Mechanical Components.... 3 years
- > Electronics 2 years
- > Wear Items.....1 year
- > Labor1 year
